Terms of Reference (TOR)

Senior Management Information System (MIS) Officer (Category E)

Background

The Smallholder Agribusiness and Resilience Project (SARP) is co-funded by the International Fund for Agricultural Development (IFAD) and the Government of Sri Lanka. It aims to contribute to reduce poverty among small-scale farmers and increase food security and nutrition in dry zones by building resilience and enabling rural households to access markets in geographies affected by climate change. The project is focused in select hotspots in Vauniya, Mannar, Puttlam, Kurunegala and Mathale districts aligned across the Deduru oya, Mee oya and Malwathu Oya river basins. The Total Project Finance Value is USD 59.57 Mn.

Scope of work:

The Senior Management Information System (MIS) Officer will work under the direct supervision of the Monitoring & Evaluation Specialist, Deputy Project Director, and Project Director, and in close collaboration with the staff of the Project Management Unit (PMU). He/She will be responsible for all Monitoring Information System–related matters under the Smallholder Agribusiness and Resilience Project (SARP) at the national level.

He/ She will be responsible for developing a spatial data and information analysis and mapping platform utilizing Geographical Information Systems (GIS), Remote Sensing (RS), Global Positioning Systems (GPS) and visualization techniques. The system should be able to provide necessary data and information, analyze for creation of solutions, and share them as online sources.

1. MIS Development and Management

- Design, develop, and maintain the **Monitoring Information System (MIS)** to support project monitoring and reporting.
- Ensure the MIS system is functional, secure, and regularly updated.
- Develop data entry interfaces, dashboards, and reporting modules.
- Integrate MIS with other digital platforms used by the project.

2. Data Collection and Data Management

- Establish standardized **data collection formats, templates, and guidelines** for field staff.
- Ensure timely and accurate **data entry, validation, and verification** of project data.
- Maintain project databases including beneficiary, activity, financial, and progress data.
- Ensure proper data storage, backup, and security procedures.

3. Monitoring and Reporting

- Generate **periodic monitoring reports** (monthly, quarterly, annual) using MIS data.
- Prepare **progress dashboards, indicators tracking, and analytical reports** for management.
- Support preparation of reports required by **government agencies, donors, and stakeholders**.
- Track key project indicators and performance targets.

4. System Administration and Technical Support

- Provide technical support to MIS users including project staff and field officers.
- Troubleshoot system errors and coordinate with developers if required.
- Maintain system updates and ensure system performance optimization.

5. Data Quality Assurance

- Conduct **data quality checks and validation processes** to ensure reliability of information.
- Identify data inconsistencies and coordinate with field teams to correct them.
- Develop procedures for **data verification and audit trails**.

6. Training and Capacity Building

- Conduct training sessions for project staff on **MIS usage, data entry, and reporting tools**.
- Prepare user manuals, guidelines, and SOPs for the MIS system.
- Support field teams in improving digital data management practices.

7. Coordination and Communication

- Coordinate with **programme specialists, M&E officers, and field staff** to ensure timely data flow.
- Facilitate data sharing among project units and stakeholders.
- Participate in project review meetings and present MIS-based analysis.

8. Documentation and System Improvement

- Document MIS procedures, workflows, and system architecture.
- Identify opportunities for **system improvements and automation**.
- Recommend new technologies or tools to improve monitoring efficiency.

Key Responsibilities of the MIS Officer

- Developing MIS modules using the PHP Laravel framework in line with project requirements
- Designing and implementing secure and efficient MySQL database structures and backend logic
- Developing responsive and user-friendly interfaces using Bootstrap and CSS

- Preprocessing, validating, and uploading data to ensure accuracy, consistency, and system integrity.
- Collaborating with the development team using GitHub for version control and codebase management.
- Conducting comprehensive system testing, debugging, and issue resolution to ensure reliability.
- Deploying the MIS to a secure and stable live hosting environment.
- Continuously enhancing and updating the MIS to meet evolving user and stakeholder needs.
- Undertake any additional tasks and responsibilities that may be assigned by the Project Director, Deputy Project Director and M&E Specialist
